DETAILED ACTION

1. Claims 1-27 are pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over the document "Profitability: Growing the bottom line", 1999. This document describes ways to use the Marquis (R) software to determine the profitability of individual bank customers. From page 24, item 6 shows a profit measurement which includes Net interest revenue (from page 12) and a risk provision (from the matched pool funding), direct expense and indirect expense (institution specific costs), other revenue (institution specific fees). Accordingly, the bank will attempt to match as many expenses and revenues as possible to its customer accounts as possible. The allocation of the claimed revenues and costs to specific customer accounts would have been obvious to one of ordinary skill in the art in order to give as accurate as possible a picture of the profitability of each customer.

Art Unit: 2167

With respect to Claim 9, 18 and 27, it is inherent in the disclosure that the other revenue is divided among the accounts. Depending on the type of revenue, the institution will account for it in an appropriate way. This depends on whether the revenue is most closely tied to the number of accounts (e.g. a yearly account fee), the number of transaction (e.g. in an ATM fee) or the balance in the account (e.g. deposits invested by the bank in non-account assets).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. "How profitability Analysis is used..." is a document of uncertain date (the August 7, 2001 was the date of printing; it is constantly refreshed on the website) but possibly 1995 from the context of the first paragraph.

"Canadian Bank Mines..." and "Bank of Ireland Selects Compaq.." show the use of this type of system by banks.

"Optimizing cube performance..." relates to the data mining techniques used in this environment.
